# GPS Golf Devices

GPS golf devices improve course management, reduce your handicap and make playing golf faster. They are growing in both acceptance and popularity, and now there is the Golf Guru 4 which has a range of functions to be used off the golf course as well.

On-Pin has developed the first consumer product (Guru 4) which is the most comprehensive golf GPS device on the market. It also has other uses like road navigation, music and video capabilities.

## Features of the product:

**Accuracy:** Guru 4 locks onto 20 satellites, meaning **accuracy to less than 1.2m**. The receiver in the unit is the most sophisticated as any on the market and as such the unit works when walking under trees, and updates immediately.

**Aerial View of each hole:** Guru 4 shows you an aerial shot of each hole, which updates as you walk the hole. The unit is touchscreen and adjustable so the golfer can find all distances to any spot on the hole. Great for course management and for **reducing your handicap**.

**Road Navigation:** When you leave the golf course you take your Guru 4 with you and use it as a road navigation unit week in week out. You can also find the nearest golf courses and how far they are. Great for travelling and the golf holiday!

**No annual or lifetime fee:** Most other units are like mobile phone contracts, where you purchase the unit, and there is an annual fee payable depending on how many courses you download. **There is absolutely NO annual fees or lifetime fees with the Guru 4.**

**22,000 Courses FREE:** With the Guru 4 you have access to 22,000 courses worldwide FREE, and growing. Any course also available upon request. The unit is also able to store up to 200 courses.

**Other Functions:** Yes the Guru 4 is multi function. You can listen to music, view pictures and watch movies on it. You can even read books on it! This is the first time a multi function golf device has been developed and it has been done by the most experienced GPS golf engineers in the world. The screen is super bright and the touch-screen makes it easy to use.

The feature packed device is GREAT VALUE at \$649. You will not find another device you can use off the golf course like the Guru 4. It is a unit the whole family can use. The kids can use it camping to watch movies, you can take it travelling and read books on it, watch videos or view photos. Or just simply travel with your Guru 4, using it as road GPS and then golf GPS.

Road navigation & Golf GPS are both growing in popularity so why not buy one that can do it all!
